GLIMPSES OF LAST EDITION

The **10th edition** of Nonwoven Tech Asia, a premier international exhibition focused on Nonwoven and Hygiene Technology, was successfully held from **August 22nd to 24, 2024**, at the Bombay Exhibition Center, Mumbai, Maharashtra. Drawing over 8,200 visitors from India and abroad, the event solidified its reputation as a crucial platform for innovation and collaboration in the nonwoven industry.

The inauguration ceremony was graced by the esteemed **Chief Guest, Hon. Giriraj Singh, Minister of Textiles, Government of India**, alongside **Mr. Bhadresh Dodhia**, Chairman of MATEXIL (The Manmade and Technical Textiles Export Promotion Council), and other distinguished industry leaders. Their presence underscored the significance of the event as they jointly inaugurated what has become a milestone in the growth of the nonwoven sector.

This edition of Nonwoven Tech Asia offered a vital platform for professionals from various sectors, including **Nonwoven Medical and Hygiene, Nonwoven Converting, Filtration, Packaging, Agriculture, Hospitality, Printing, and Government bodies**. Attendees explored cutting-edge innovations, exchanged valuable insights, and expanded their expertise, marking a pivotal step in the evolution of nonwoven technology. The event set the tone for future advancements, reinforcing its importance in shaping the industry's future trajectory.

FOCUS SEGMENTS

HYGIENE

Modern disposable absorbent hygiene products have made an important contribution to the quality of life and skin health of millions of people. Users of baby diapers, feminine hygiene products and adult incontinence products benefit from the softness, smoothness, leakage prevention, strength and protection provided by nonwoven fabrics.

MEDICAL

Nonwovens are extensively used in the medical field and in protection against biological agents in other sectors. With today's multi-drug resistant strains of bacteria and virus, nonwovens can help in the fight against cross-contamination and the spread of infection in a medical or surgical environment.

FILTRATION

Filtration is One of the Fastest Growing Segments in the Nonwoven Industry, filtration is characterized by dozens of end use areas and applications.

Nonwovens can be engineered very precisely to meet exacting specifications and stringent regulatory requirements for the filtration of air, liquid, bacteria, dust, gas and a myriad of other areas.

AUTOMOBILE

Today more than 40 Automotive Parts are made with Nonwoven Fabrics, from Trunk Liners & Carpets to air & fuel filters. By building in the essential properties which are necessary for good performance and safety, Nonwovens help reduce the weight of the car, enhance the comfort and aesthetics and provide advanced insulation, fire retardancy and resistance to water, fuels, extremes of temperature and abrasion.

PACKAGING

Nonwoven solutions such as oxygen-scavenging packaging for foodstuffs and anti-static packaging for computer equipment are just two of the innovative packaging solutions available today. Packaging industry experts are looking to Nonwovens for alternative solutions and the flexibility of the materials provide is testament to the potential Nonwovens have as a packaging medium of the present and the future.

PROTECTIVE AGRICULTURE

The use of Nonwoven Crop covers on the land increases yields and improves the quality of the Crops. Very light, flexible sheets are laid over seed beds, which create a microclimate in which the heat and humidity are controlled.

The growth of the plants is accelerated and they are protected from adverse weather conditions and vermin.

GEOTEXTILE

Geo-Nonwovens, speciality in the civil engineering field, form the backbone of numerous civil engineering projects.

Nonwoven Geotextiles are multi-purpose Fabrics that are felt-like in appearance.

The main functions for these products are filtration and separation.

OTHERS

Nonwoven Fabrics provide specific functions such as absorbency, liquid repellence, resilience, stretch, softness, strength, flame retardancy, wash ability, cushioning, filtering, bacterial barriers and sterility.
